

Courses on NXP i.MX SoCs

ACSYS offers a large set of courses on NXP processors.

Each course details both hardware and software implementation of these processors.

Examples are provided to explain low level programming, which is needed to understand the boot program.

For on-site trainings, an additional day covering Linux porting or Windows Embedded porting may be appended to i.MX processor courses.

Customs, the SoC Reference Manual being still not available. Note that course can only be provided to NXP approved training partners. Contact us at training@ac6-training.com for any further details.

Programming with FreeRTOS on AC6 SoCs guide à travers la programmation embarquée applications en temps réel en mettant l'accent sur des aspects cruciaux tels que task scheduling, synchronisation et memory management. Prestige aux développeurs ayant une compréhension de base des systèmes temps réel, ce cours offre une solide fondation des applications en temps réel pour des solutions IoT et embarquées modernes.
